# GCSE COMBINED SCIENCE: TRILOGY

# H

Higher Tier  
Biology Paper 2H

Friday 9 June 2023

Afternoon

Time allowed: 1 hour 15 minutes

## Materials

For this paper you must have:

- a ruler
- a scientific calculator.

## Instructions

- Use black ink or black ball-point pen.
- Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

## Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

0	1
---	---

Sexual reproduction in humans involves the production of egg cells and sperm cells.

0	1	.	1
---	---	---	---

Name the type of cell division that produces egg cells and sperm cells.

[1 mark]

---

0	1	.	2
---	---	---	---

Sexual reproduction produces offspring that are genetically different from each other.

Give **two** reasons why sexual reproduction causes variation in the offspring.

[2 marks]

1 

---

---

2 

---

---

**Question 1 continues on the next page**

**Turn over ►**

Polydactyly is an inherited disorder.

The allele for polydactyly is dominant, **D**.

A person with two copies of the allele **d** will **not** have polydactyly.

**0 1 . 3** A person with the genotype **DD** is homozygous.

What word describes the genotype **Dd**?

[1 mark]

---

**0 1 . 4** A person with the genotype **Dd** and a person with the genotype **dd** plan to have a child.

Determine the probability that the child will have polydactyly.

You should:

- complete the Punnett square diagram
- identify any offspring genotype that would have polydactyly.

[5 marks]

Probability that the child will have polydactyly = \_\_\_\_\_

0 1 . 5

Embryos can be screened for the alleles that cause inherited disorders.

Give **two** advantages of embryo screening.**[2 marks]**

1 \_\_\_\_\_

\_\_\_\_\_

2 \_\_\_\_\_

\_\_\_\_\_

**Turn over for the next question****Turn over ►**

**0 2**

It is estimated that 99.9% of all species that have ever existed are now extinct.

**0 2 . 1**

Why is the percentage of species that are extinct only an estimate?

**[1 mark]**

Tick (✓) **one** box.

All individuals of one species have the same genes.

Extinction is always caused by humans.

Humans have not found evidence of every species.

**0 2 . 2**

What evidence is used to study species that have become extinct?

**[1 mark]**

---

---

0 3 . 2

Students used a valid method to investigate how the distance from the river affects the number of different plant species in the field.

Figure 2 shows the results.

Figure 2

What is shown by the data in **Figure 2**?

[1 mark]

Tick (✓) **one** box.

Fewer different species are always recorded nearer to the river.

The mean value students can be most certain about is 5 metres from the river.

The number of species recorded 6 metres from the river is anomalous.

Question 3 continues on the next page

Turn over ►

Cows walk on the ground near the river more than they walk on the ground further from the river.

Do not write  
outside the  
box

0 3 . 3

Which is an **abiotic** factor that could affect the number of different plant species found near the river?

[1 mark]

Tick (✓) **one** box.

Microorganisms near the roots

Moisture levels in the soil

Oxygen concentration in the air

Primary consumers in the field

0 4

Sea lice are small animals that feed on the skin and blood of salmon fish.

**Figure 3** shows sea lice attached to the skin of a salmon, *Oncorhynchus keta*.

**Figure 3**

0 4 . 1

What is the genus name of salmon?

[1 mark]

---

0 4 . 2

Which domain are sea lice classified in?

[1 mark]

---

0 4 . 3

Some salmon have genes that result in fewer sea lice attaching to the skin.

Describe how fish farmers can selectively breed salmon that sea lice **cannot** attach to.

[3 marks]

---

---

---

---

---

---

---

0 4 . 4

Explain the advantages to salmon farmers of producing salmon that do **not** have sea lice attached to their skin.

[3 marks]

---

---

---

---

---

---

---

Question 4 continues on the next page

Turn over ►

Do not write  
outside the  
box

0 4 . 5

Explain the **disadvantage** of selectively breeding salmon.

Do **not** refer to cost or to time in your answer.

[2 marks]

---

**0 5**

In Vitro Fertilisation (IVF) can be used to treat infertility.

**0 5 . 1**

Which hormones are given to women having IVF treatment?

**[1 mark]**Tick (✓) **one** box.

FSH and LH

FSH and oestrogen

LH and oestrogen

**0 5 . 2**

Name the target organ of the hormones used for IVF.

**[1 mark]**

---

**0 5 . 3**

Describe why microscopes are needed in the process of IVF.

**[1 mark]**

---

---

**Question 5 continues on the next page****Turn over ►**

0 5 . 4

Describe how the hormones given to women during IVF treatment **interact** with other hormones to prepare the body for pregnancy.

**[3 marks]**

---

---

---

---

---

---

Scientists studied women who had IVF treatment.

**Table 1** shows the results.

**Table 1**

	Number of women
Received IVF treatment	450
Successful IVF treatment	135

0 5 . 5

Calculate the **simplest** ratio of the number of women who had successful IVF to the number of women who had unsuccessful IVF.

Give the ratio in whole numbers.

[2 marks]

---

---

---

---

Ratio (whole numbers) = \_\_\_\_\_ :

0 5 . 6

Suggest **one** factor that can affect the probability of a woman having a child as a result of IVF treatment.

[1 mark]

---

---

0 5 . 7

Give **two** arguments against the use of IVF treatment.

Do **not** refer to cost or to religion in your answer.

[2 marks]

1 \_\_\_\_\_

---

2 \_\_\_\_\_

---

**0 6**

The control of body temperature is an example of homeostasis.

**0 6 . 1**

Give **one** other internal condition controlled by homeostasis.

Do **not** refer to temperature in your answer.

**[1 mark]**

---

**0 6 . 2**

Explain why the control of body temperature is important.

**[2 marks]**

---

---

---

---

**Question 6 continues on the next page**

**Turn over ►**

The body temperature of long-distance swimmers can change as the length of time swimming in cold water increases.

**Figure 4** shows how the body temperature of one swimmer changed in the first 4 hours of a long-distance swim.

**Figure 4**

0 6 . 3

Calculate the mean rate of body temperature decrease per hour in the first 4 hours of the swim.

**[2 marks]**

---

---

---

---

Rate = \_\_\_\_\_ °C per hour

Do not write  
outside the  
box

找名导师，用小章线上辅导（微信小程序同名）

**0 6 . 4**

Hypothermia is a dangerously low body temperature.

For this swimmer, a 5.5% decrease in body temperature from the start of the swim will cause hypothermia.

Determine the body temperature at which this swimmer will start to have hypothermia.

Give your answer to 2 significant figures.

**[4 marks]**

---

---

---

---

---

---

---

---

Body temperature (2 significant figures) = \_\_\_\_\_ °C

**Question 6 continues on the next page**

**Turn over ►**

Do not write  
outside the  
box

0 6 . 7

Explain how the thyroid gland controls the response to a decrease in body temperature by negative feedback.

[3 marks]
