# AS ECONOMICS

Paper 2 The National Economy in a Global Context

Time allowed: 1 hour 30 minutes

# Materials

For this paper you must have:

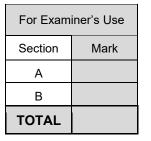

- the Insert
- a calculator.

#### Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer all questions in Section A.
- Answer either Context 1 or Context 2 in Section B.
- You will need to refer to the Insert provided to answer Section B.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

## Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- No deductions will be made for wrong answers.

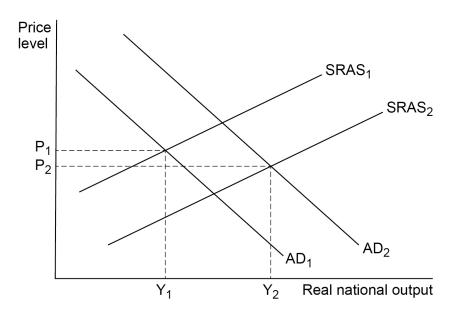

#### Section A

| Occilon A   |          |  |  |  |  |  |
|---|----------|--|--|--|--|--|
| Answer all questions in this section.   |          |  |  |  |  |  |
| Only <b>one</b> answer per question is allowed.  For each question completely fill in the circle alongside the appropriate answer.  CORRECT METHOD  WRONG METHODS  WRONG METHODS  WRONG WETHODS  WRONG WETHODS |          |  |  |  |  |  |
| 0 1 Which one of the following is most likely to be an objective of government economic policy?   |          |  |  |  |  |  |
| A A low level of employment   |          |  |  |  |  |  |
| <b>B</b> A lower price level  |          |  |  |  |  |  |
| C An equal distribution of income   |          |  |  |  |  |  |
| <b>D</b> An increase in productive potential  |          |  |  |  |  |  |
|   | [1 mark] |  |  |  |  |  |

|   |          |  |  |  |  |  |

**0 2** Figure 1 shows the aggregate demand (AD) and short-run aggregate supply (SRAS) curves for an economy.

Figure 1

Which one of the following combinations of events is most likely to cause the curves to shift from  $AD_1$  to  $AD_2$  and from  $SRAS_1$  to  $SRAS_2$ ?

- A A higher rate of savings and faster labour productivity growth
- **B** Faster economic growth abroad and lower world commodity prices
- C Higher money wages and more household consumption
- **D** Lower interest rates and a higher rate of indirect taxes

[1 mark]

0 3 The main reason that economic statistics are often expressed as index numbers is to

- A allow easier comparison of data.
- **B** calculate cost of living data.
- C convert nominal data to real data.
- **D** even out fluctuations in raw data.

0 7

0 8

Index numbers for real GDP per head for Country X and Country Y, are shown in **Table 1**.

Table 1

| Year | Country X | Country Y |
|------|-----------|-----------|
| 2016 | 100       | 100       |
| 2017 | 102       | 104       |
| 2018 | 101       | 103       |
| 2019 | 105       | 107       |

From Table 1 it can be concluded that real GDP per head

**D** real incomes may have risen or fallen.

| A grew at the same rate between 2018 and 2019 in both countries   | S. O                     |
|---|--------------------------|
| <b>B</b> grew every year throughout the period in both countries.   | 0                        |
| <b>C</b> rose faster in Country X between 2017 and 2019.  | 0                        |
| <b>D</b> was higher in Country Y than in Country X from 2017 to 2019.   | 0                        |
|   | [1 mark]                 |
| Nominal GDP for an economy fell from £318 billion to £310 billion. over the same period. It can be concluded that | Average prices also fell |
| A deflation resulted in a recession.  | 0                        |
| <b>B</b> output fell, but by less than £8billion.   | 0                        |
| <b>c</b> real GDP was lower at the end of the period.   | 0                        |
