H156/01: Breadth in physics

Advanced Subsidiary GCE

Mark Scheme for Autumn 2021

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

RM ASSESSOR

Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
AE	Arithmetic error
BOD	Benefit of doubt given
BP	Blank page
CON	Contradiction
ECF	Error carried forward
L1	Level 1
L2	Level 2
L3	Level 3
POT	Power of 10 error
SEEN	Seen
SF	Error in number of significant figures
TE	Transcription error

XP	Wrong physics or equation	Used in <u>numerical answers only</u> , unless otherwise specified in the mark scheme. Use of an incorrect equation is wrong physics even if it happens to lead to the correct answer.
^	Omission	Used to indicate where more is needed for a mark to be awarded (what is written is not wrong but not enough).

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
Reject	Answers which are not worthy of credit
Not	Answers which are not worthy of credit
Ignore	Statements which are irrelevant
Allow	Answers that can be accepted
()	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

SECTION A

Question	Answer	Marks	Guidance
1	D	1	
2	B	1	
3	D	1	
4	C	1	
5	B	1	
6	C	1	
7	C	1	
8	D	1	
9	A	1	
10	D	1	
11	A	1	
12	A	1	
13	B	1	
14	B	1	
15	D	1	
16	C	1	
17	D	1	
18	A	1	
19	D	1	
20	C	1	
Total		20	

SECTION B

General rule: For substitution into an equation, allow any subject – unless stated otherwise in the guidance

Question			Answer	Marks	Guidance
21	(a)		Separation between droplets increases (further down)	B1	
	(b)		'No motion' explained either in terms of the first law or second law There is no / negligible resultant force	B1 B1	Allow $F = ma$, since $F = 0$, a is zero (hence at rest) Allow an object continues in a state of rest or uniform motion unless acted upon by a (resultant) force. ALLOW no frictional/extra/new force
	(c)	(i)	Tangent drawn at $t = 4.0$ s Attempt at calculating the gradient v calculated from gradient and between 9.50 - 10.50 (m s^{-1}) OR $s = 20$ (m) and $s = \frac{1}{2} at^2$ $20 = \frac{1}{2} a \times 4.0^2$ or $a = 2.5$ (m s^{-2}) $v = 2.5 \times 4.0$ or $v^2 = 2 \times 2.5 \times 20$ $v = 10$ (m s^{-1})	C1 C1 A1 C1 C1 C1 A0	Allow other correct methods Note working required for this mark
	(c)	(ii)	change in momentum = 1200×10 or 12000 (kg m s^{-1}) rate of change of momentum = 3000 unit: kg m s^{-2} or N OR $F = 1200 \times 2.5$ rate of change of momentum = 3000 unit: kg m s^{-2} or N	C1 A1 B1 C1 A1 B1	Allow ECF from (c)(i) Allow 2850 - 3150 Allow newton Allow ECF from (c)(i) Allow newton
			Total	9	

Question			Answer	Marks	Guidance
22	(a)		Ruler (with mm scale)	B1	Allow any instruments with a mm scale e.g. tape measure NOT calipers and micrometre
	(b)		$\frac{0.002}{0.1000} (\times 100)$ or $\frac{0.1}{1.4} (\times 100)$ or $g = \frac{1.4^2}{2 \times 0.100}$ $(2 \times 0.071... + 0.02)$ or $0.1628 \dots$ or 16.3% absolute uncertainty = $1.6 \text{ (m s}^{-2}\text{)}$ OR $g_{\max} = \frac{1.5^2}{2 \times 0.098} (= 11.48)$ or $g_{\min} = \frac{1.3^2}{2 \times 0.102} (= 8.28)$ range = $3.2 \text{ (m s}^{-2}\text{)}$ absolute uncertainty = $1.6 \text{ (m s}^{-2}\text{)}$	C1 C1 A1 C1 C1 A1	Allow 1SF answers here for uncertainties Not $g = 9.8$ for this C1 mark; must see working Allow 0.16 or 16% Note: The answer must be given to 2 SF Ignore value of g given on the answer line, e.g. 9.8 ± 1.6 Note: The answer must be given to 2 SF
			Total	4	

Question			Answer	Marks	Guidance
23	(a)		Circuit diagram with LED, voltmeter and ammeter connected to a supply with correct polarity and some means of adjusting the p.d. Increase the p.d. until the LED is just lit / current is shown in the circuit ORA To observe the light from LED use a tube / turn lights off	B1 B1 B1	Allow variable (power) supply / variable resistor in circuit Allow this on a labelled diagram e.g. tube drawn around the diode
	(b)	(i)	$\frac{0.045}{1.6 \times 10^{-19}}$ number of electrons = 2.8×10^{17}	C1 A1	
		(ii)	$A = \pi \times (0.12 \times 10^{-3})^2$ or $4.5(2) \times 10^{-8} \text{ (m}^2\text{)}$ $0.045 = \pi \times (0.12 \times 10^{-3})^2 \times 6.3 \times 10^{28} \times 1.6 \times 10^{-19} \times v$ $v = 9.9 \times 10^{-5} \text{ (m s}^{-1}\text{)}$	C1 C1 A1	Allow 2 marks for $2.5 \times 10^{-5} \text{ (m s}^{-1}\text{)}$; 0.24 mm and POT error
	(c)	(i)	(Current causes) increase in temperature of thermistor Resistance of thermistor decreases (and hence V decreases) or Current in the circuit increases, p.d. across resistor increases (and hence V decreases)	B1 B1	Allow warms up/heat ups Ignore increase temperature of the circuit
		(ii)	$V = 2.4 \text{ (V)}$ or $V_R = 3.6 \text{ (V)}$ $I = 0.30 \text{ (A)}$ resistance = $8.0 \text{ (}\Omega\text{)}$ OR $V = 2.4 \text{ (V)}$ and a potential divider equation / idea $2.4 = \frac{R}{R+12} \times 6.0$ or $\frac{R}{2.4} = \frac{12}{3.6}$ resistance = $8.0 \text{ (}\Omega\text{)}$	C1 C1 A1 C1 C1 A1	Not $V = 2.2 \text{ (V)}$; misreading Allow ECF if $V = 2.2 \text{ (V)}$ is used Allow 8 (1 SF answer) Not $V = 2.2 \text{ (V)}$; misreading Allow ECF if $V = 2.2 \text{ (V)}$ is used Allow 8 (1 SF answer)
			Total	13	

Question			Answer	Marks	Guidance
24	(a)		Both travel at the same speed / speed of light/ $3.0 \times 10^8 \text{ m s}^{-1}$	B1	Ignore travels at 'c'
	(b)		$3.0 \times 10^8 = f \times 2.5 \times 10^{-11}$ $f = 1.2 \times 10^{19} \text{ (Hz)}$	C1 A1	
	(c)		Use of $E = hf$ or $E = hc/\lambda$ EITHER $(\lambda) \text{ number} = (500 \times 10^{-9}) / (2.5 \times 10^{-11})$ $\text{number} = 2.0 \times 10^4$ OR $(E) \text{ number} = (7.96 \times 10^{-15}) / (3.98 \times 10^{-19})$ $\text{number} = 2.0 \times 10^4$ OR $(f) \text{ number} = (1.2 \times 10^{19}) / (6 \times 10^{14})$ $\text{number} = 2.0 \times 10^4$	C1 C1 A1 C1 A1 C1 A1	Allow ECF from (b) Allow ECF from (b)
			Total	6	

Question			Answer	Marks	Guidance
25	(a)	(i)	It is longitudinal	B1	
		(ii)	Loudspeaker, microphone/ear and slit	B1	Allow doorway for a slit/gap – receiver for microphone
			Sound spreads from the slit AW	B1	Not diffraction (since it is in the stem of the question)
			Size of slit comparable to the wavelength (of sound)	B1	
	(b)	(i)	(refraction index) = speed of light in vacuum $\div$ speed of light in material	B1	Note light must be mentioned at least once Allow $n = c/v$ if all terms defined Allow ratio of speed of light in vacuum to speed of light in material NOT speed of light in air for c
		(ii)1	Frequency (of light) is the same (in A and B) (Light travels) slower in B or $v_B = 0.77v_A$ OR A $v = f\lambda$ <u>and</u> $\lambda_B < \lambda_A$	B1 B1 B1	Allow f for frequency Allow v directly proportional to λ
		(ii)2	$\sin 60^\circ = 1.3 \times \sin \theta$ $\theta = 42^\circ$	C1 A1	
		(ii)3	(No total internal reflection) Internal reflection / critical angle can only occur for light travelling from B to A AW	B1	Allow TIR can only occur for light entering an optically less dense material/lower refractive index OR A Not $\theta < \phi$
			Total	11	

Question			Answer	Marks	Guidance
26	(a)		weight $\times y = Fx$	M1	Allow W or mg $Wy = Fx$ or $mgy = Fx$
			$(AL\rho g) \times y = Fx$	M1	
			$y = \left(\frac{F}{AL\rho g}\right)x$	A0	
	(b)	(i)	Straight line of best fit drawn through the data points	B1	Allow gradient in the range 1.40 - 1.60
			Gradient = 1.5	B1	
		(ii)	$\left(\frac{F}{AL\rho g}\right) = 1.5$ $\frac{6.8}{6.4 \times 10^{-5} \times 0.90 \times \rho \times 9.81} = 1.5$ $\rho = 8.0 \times 10^3 \text{ (kg m}^{-3}\text{)}$	C1	Allow ECF from (b)(i)
				C1	
				A1	
			Total	8	Note must be consistent with gradient value from (b)(i)
