

Please check the examination details below before entering your candidate information

Candidate surname		Other names	
Pearson Edexcel		Centre Number	Candidate Number
Level 3 GCE			
Time 2 hours 15 minutes	Paper reference	9GE0/01	
Geography Advanced PAPER 1			
You must have: Resource Booklet (enclosed) Ruler, calculator			Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions in Section **A**, and Section **C**.
- Answer **either** Question 2 **or** Question 3 in Section **B**.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- Calculators may be used.
- Any **calculations** must show **all** stages of **working out** and a **clear answer**.

Information

- The total mark for this paper is 105.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Good luck with your examination.

SECTION A**Tectonic Processes and Hazards****Answer ALL questions. Write your answers in the spaces provided.**

- 1** Study Figure 1a and Figure 1b which show the magnitude and duration of eight selected earthquakes.

Earthquake	Earthquake magnitude Moment Magnitude Scale (MMS)	Duration in seconds
A	6.9	120
B	5.4	1
C	9.0	
D	6.8	6.8
E	6.9	280
F	7.3	24
G	6.4	5.9
H	7.0	7.8

Figure 1b

- (a) (i) Using Figure 1b complete Figure 1a by stating the duration of earthquake C. (1)
- (ii) Complete Figure 1b by plotting earthquake F using the data from Figure 1a. (2)
- (iii) Draw a regression (best-fit) line on Figure 1b to show the relationship between earthquake magnitude and duration. (1)

(b) Assess the view that the social and economic impacts of earthquakes are mainly the result of their magnitude.

TOTAL FOR SECTION A = 16 MARKS

Answer ONE question – EITHER Question 2 OR Question 3.

You must use the Resource Booklet provided.

- (a) Explain how changes in the mass balance of the glacier will affect the hydrological cycle.

(6)

DO NOT WRITE IN THIS AREA

(b) Explain the differences in the characteristics of the deposits at locations A and B.

This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting or typing. There are no margins, text, or other markings on the page.

(c) Explain the importance of ice temperature in understanding the rate of glacial movement.

(8)

**SECTION B**

The following resources relate to Question 2.

Figure 2a

**Changing mass balance of the glacier (in metres of water equivalent)
of the South Cascade Glacier in North America since 1956**

Key: Snout = the end of/terminal position of the glacier

Sediment characteristics	Interquartile range of the longest axis	Average roundness index
Location A	26–350 cm	Mostly angular
Location B	4–39 cm	Mostly rounded

Figure 2b

Pro-glacial deposits at the snout of the Spielboden Glacier

The following resources relate to Question 3.

Figure 3a

An estimate of change in sea level over the last 140,000 years

Beach morphology and sediment characteristics	Mean angle of beach profile (in degrees)	Interquartile range of the longest axis (in mm)
Summer	4	0.1 to 2
Winter	8	1 to 22

Figure 3b

A beach photographed in summer and winter

**SECTION C**

The following resources relates to Question 4.

Figure 4a

**Actual and forecast changes in oil production
in Canada from 2010 to 2030**

Unconventional oil reserves include tar sands, oil shale and deep water oil.
