

# Wednesday 1 December 2021 – Morning GCSE (9–1) Geography A (Geographical Themes)

J383/03 Geographical Skills

Time allowed: 1 hour 20 minutes

#### You must have:

• the Resource Booklet (inside this document)

#### You can use:

- · a scientific or graphical calculator
- a ruler (cm/mm)

Please write clea	arly in blac	k ink. <b>Do</b>	not wri	te in the barcodes.		
Centre number				Candidate number		
First name(s)						
Last name						

### **INSTRUCTIONS**

- Use black ink. You can use an HB pencil, but only for graphs and diagrams.
- Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.
- Answer all the questions.

## **INFORMATION**

- The total mark for this paper is 65.
- The marks for each question are shown in brackets [ ].
- Quality of extended response will be assessed in questions marked with an asterisk (\*).
- Spelling, punctuation and grammar (SPaG) and the use of specialist terminology will be assessed in questions marked with a pencil ( ).
- This document has 16 pages.

#### **ADVICE**

Read each question carefully before you start your answer.

## Section A – Geographical Skills

Answer all the questions.

Stu	udy <b>F</b> i	g. 1 in the separate Resource Booklet, an article about the El Niño weather event.
(a)	(i)	State the percentage chance of an El Niño event as a decimal.
		[1]
	(ii)	Identify how the UK winter weather is likely to be affected by this El Niño event.
		A increased wind and rain B increased wind and snow C less wind and drier conditions D less wind and more snow
		Write the correct letter in the box. [1]
	(iii)	Identify <b>two</b> environmental impacts of El Niño weather events according to <b>Fig. 1</b> .
		1
		2 <b>[2]</b>
(b)		dy <b>Fig. 2</b> in the separate Resource Booklet, which shows the effect of El Niño on global ather patterns.  Suggest <b>one</b> way to improve how the information in <b>Fig. 2</b> is presented. Explain your answer.
		[2]
	(ii)	Which two world regions does <b>Fig. 2</b> suggest will have <b>dry and warm</b> conditions due to El Niño?
		<ul> <li>A Central Africa and Southern India</li> <li>B Europe and Northern Africa</li> <li>C Indonesia and South-East Africa</li> <li>D South America and Japan</li> </ul>
		Write the correct letter in the box. [1]

1

The table below shows the peak river flow for December of selected rivers in the Region Size of river catchment (sq. km) (cumecs)  Eden 2286 1700  Ribble 1145 1130  Tees 818 614  Tweed 4390 1361  Tyne 2176 1730  Wharfe 759 581  Calculate the mean value for peak river flow from the data shown. You must showorking out.	Describe the pattern of river flow shown in Fig. 3.

(d)\* Study the table below, which compares the effects of extreme weather events.

1.	UK Flood Event – December 2015	2.	El Niño in Somalia – June 2016
•	Many homes across the North West suffered from power cuts. 5200 homes were affected by flooding.	•	Many animals died of thirst and starvation.  Many crops died.  144 000 people in Somalia were forced to
•	About 40 schools closed in Cumbria.		move from their homes.
•	Rail and road services were disrupted.  Many businesses suffered through damage	•	Severe water shortages resulted in the use of polluted water sources.
•	to property and stock.  The estimated cost was £500 million across	•	Fires caused by drought destroyed vegetation and animals' habitats.
•	the county of Cumbria.  Heavy rain washed nutrients from soil.	•	Rivers dried up causing fish to die or migrate.
•	Vegetation was flooded causing habitat loss.	•	Increased soil erosion destroyed vegetation.
		•	Droughts harmed the quality of the soil affecting farming for years to come.

'Extreme weather events have a greater impact on LIDCs such as Somalia than they do on the UK.'

Use the table above and your own understanding to answer.
[8]

To what extent do you agree with this statement?

2	Stu	dy <b>Fig. 4</b> in the separate Resource Booklet, a map of exports from Heathrow Airport.	
	(a)	Which city received the highest amount of exports from Heathrow?	
		A Hong Kong B Lagos C Melbourne D Shanghai	
		Write the correct letter in the box.	[1]
	(b)	Read the article below.	
	count It ser thous	eight through Heathrow alone accounts for almost a quarter of UK trade with non-EU tries by value. The airport is the UK's key hub airport for cargo, as well as passengers. ves at least 79 destinations directly with cargo operations and has links to over one sand others. 2 million tonnes of air cargo passes through the airport each year, in addition e 60 million passengers, accounting for 474 000 air transport movements per year.	
		Express the ratio of cargo to passengers at Heathrow Airport in its simplest form.	
		Show your working out.	
	(c)	Explain how <b>Fig. 4</b> uses flow lines to display the data.	. [2]
	( )		
			. [2]

(d)	Using information from <b>Fig. 4</b> , describe the pattern of exports from Heathrow Airport.
	[3]
(e)	Suggest <b>one</b> alternative way that the data in <b>Fig. 4</b> might be displayed. Justify your choice.
,	
	[2]

3

	ay <b>Fi</b> nada.	g. 5 in the separate Resource Booklet, which shows a climate graph for a region of	
(a)	Esti	mate the mean precipitation in the month of May.	
			[4]
(b)	Wh	at would be the most likely temperature in the month of November?	ניו
		-28°C -2°C 2°C 28°C	
	Wri	te the correct letter in the box.	[1]
(c)		ng <b>Fig. 5</b> , suggest how the climate shown would lead to the distinctive characteristics obtain ecosystem.	of
			[3]
(d)	Stu	dy <b>Fig. 6</b> in the separate Resource Booklet, a diagram and report on climate change.	
	(i)	State <b>one</b> abiotic component of the ecosystem shown in <b>Fig. 6</b> .	
			[1]
	(ii)	Identify <b>two</b> reasons for the decline in polar bear populations.	
		1	
		2	
		2	
			[2]

(iii)	Assess how far climate change has a greater impact on polar ecosystems than any other ecosystem worldwide.
	Use Fig. 6 and your own understanding to answer.

## ${\bf Section} \; {\bf B} - {\bf Geographical} \; {\bf Fieldwork}$

Answer all the questions.

4 Some geography students have been conducting **human geography** fieldwork in a town centre. They have focused on urban regeneration. Urban regeneration is the attempt to improve both the economic and social spaces within an urban area in order to reverse its decline.

As part of their study, the students carried out an environmental quality survey, which is shown in the table below.

	-2	-1	0	1	2	
High levels of graffiti				1		No signs of graffiti
Much litter		1				No sign of litter
Evidence of vandalism (e.g. broken windows)					1	No evidence of vandalism
Buildings in poor condition					1	Buildings kept in good order

(a) (i) What is the total environmental quality score for the area shown in the table above?	
	[1]
(ii) Explain how the total environmental score and environmental quality survey for this area suggests it has benefited from regeneration.	
	. [2]
(b) Select <b>one</b> data presentation technique that might be used to present the information in environmental quality survey.	the
	[1]

(c) Study Fig. 7 in the separate Resource Booklet, which shows a photograph of the location studied. A black and white reproduction of Fig. 7 is below.

Add **three** annotations to the photograph below of the location studied to explain the features of regeneration.

5*	Some students took part in fieldwork on the Devon coast for their <b>physical geography</b> fieldwork.
	They studied the effectiveness of coastal management after a new sea wall and groynes were built in 2014.
	Study Fig. 8 in the separate Resource Booklet, which shows the results of their coastal fieldwork.
	The conclusion they reached was that 'Coastal management has been highly effective in reducing the damage to properties from storms.'
	Using <b>Fig. 8</b> , analyse the evidence from the information provided to explain whether you agree with their conclusion.
	[8]
	Spelling, punctuation and grammar and the use of specialist terminology [3]
