
GCSE ECONOMICS 8136/1

Paper 1 How Markets Work

Mark scheme

June 2023

Version: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

Level of response marking instructions

Level of response mark schemes are broken down into levels, each of which has a descriptor. The descriptor for the level shows the average performance for the level. There are marks in each level.

Before you apply the mark scheme to a student's answer read through the answer and annotate it (as instructed) to show the qualities that are being looked for. You can then apply the mark scheme.

Step 1 Determine a level

Start at the lowest level of the mark scheme and use it as a ladder to see whether the answer meets the descriptor for that level. The descriptor for the level indicates the different qualities that might be seen in the student's answer for that level. If it meets the lowest level then go to the next one and decide if it meets this level, and so on, until you have a match between the level descriptor and the answer. With practice and familiarity you will find that for better answers you will be able to quickly skip through the lower levels of the mark scheme.

When assigning a level you should look at the overall quality of the answer and not look to pick holes in small and specific parts of the answer where the student has not performed quite as well as the rest. If the answer covers different aspects of different levels of the mark scheme you should use a best fit approach for defining the level and then use the variability of the response to help decide the mark within the level, ie if the response is predominantly level 3 with a small amount of level 4 material it would be placed in level 3 but be awarded a mark near the top of the level because of the level 4 content.

Step 2 Determine a mark

Once you have assigned a level you need to decide on the mark. The descriptors on how to allocate marks can help with this. The exemplar materials used during standardisation will help. There will be an answer in the standardising materials which will correspond with each level of the mark scheme. This answer will have been awarded a mark by the Lead Examiner. You can compare the student's answer with the example to determine if it is the same standard, better or worse than the example. You can then use this to allocate a mark for the answer based on the Lead Examiner's mark on the example.

You may well need to read back through the answer as you apply the mark scheme to clarify points and assure yourself that the level and the mark are appropriate.

Indicative content in the mark scheme is provided as a guide for examiners. It is not intended to be exhaustive and you must credit other valid points. Students do not have to cover all of the points mentioned in the Indicative content to reach the highest level of the mark scheme.

An answer which contains nothing of relevance to the question must be awarded no marks.

KEY LIST

01	C – Where quantity supplied equals quantity demanded	06	D – In those with long training periods
02	A – A decrease in demand for the product	07	A – A high amount of spare capacity
03	D – technical economies of scale.	08	B – –0.8
04	B – A leisure centre	09	A – Books and tablet computers
05	B – Raw materials	10	B – 50 tonnes

Qu	Part	Marking guidance	Total marks
11		State two different examples of the factor of production known as land.	2
		AO1 = 2 1 mark for each correct example (max 2) Possible answers: • physical land • natural resources • sea • forests • minerals. Note: Do not credit two very similar answers eg Pacific Ocean and Atlantic Ocean, or two types of farm, building or mineral. This would only qualify for one mark.	

Qu	Part	Marking guidance	Total marks								
12		Explain one reason why an individual consumer may have to make an economic choice.	2								
		AO1 = 2 <table><tr><th>Marks</th><th>Description</th></tr><tr><td>2</td><td>Possible reason for economic choice for an individual consumer explained</td></tr><tr><td>1</td><td>Possible reason for economic choice for an individual consumer identified</td></tr><tr><td>0</td><td>Nothing written worthy of credit</td></tr></table> Possible answers: • limited income • limited resources • limited time • unlimited wants • any example which relates to these reasons. Note: This indicative content is not exhaustive, other creditworthy responses should be awarded marks as appropriate.	Marks	Description	2	Possible reason for economic choice for an individual consumer explained	1	Possible reason for economic choice for an individual consumer identified	0	Nothing written worthy of credit	
Marks	Description										
2	Possible reason for economic choice for an individual consumer explained										
1	Possible reason for economic choice for an individual consumer identified										
0	Nothing written worthy of credit										

Qu	Part	Marking guidance	Total marks								
13		Explain one benefit of specialisation for an individual worker. AO1 = 2 <table><tr><th>Marks</th><th>Description</th></tr><tr><td>2</td><td>Benefit of specialisation for an individual worker explained</td></tr><tr><td>1</td><td>Benefit of specialisation for an individual worker correctly identified</td></tr><tr><td>0</td><td>Nothing written worthy of credit</td></tr></table> Possible answers: • higher pay • increased employability • higher chance of promotion • greater expertise • job satisfaction. Note: This indicative content is not exhaustive, other creditworthy responses should be awarded marks as appropriate.	Marks	Description	2	Benefit of specialisation for an individual worker explained	1	Benefit of specialisation for an individual worker correctly identified	0	Nothing written worthy of credit	2

0	Nothing written worthy of credit										

Qu	Part	Marking guidance	Total marks
----	------	------------------	-------------

14	1	Using Table 2 , calculate the average fixed cost of making 15 surfboards.	2
		AO1 = 2 - total fixed cost = £1500 (1 mark) - average fixed cost = total fixed cost / output = 1500 / 15 = £100 (1 mark). Award 2 marks for a correct answer with no workings Award 1 mark if correct method with correct figures but wrong answer, eg £3000 (fixed cost) divided by 15 surfboards = £200	

Qu	Part	Marking guidance	Total marks
----	------	------------------	-------------

14	2	Explain one business objective Paul might have.	2								
		AO1 = 2 <table><tr><th>Marks</th><th>Description</th></tr><tr><td>2</td><td>Possible business objective explained</td></tr><tr><td>1</td><td>Possible business objective identified</td></tr><tr><td>0</td><td>Nothing written worthy of credit</td></tr></table> Possible answers: • profit maximisation • sales/revenue maximisation • growth • market share • stakeholder objectives • satisficing • survival • use of data from 14.1. Note: This indicative content is not exhaustive, other creditworthy responses should be awarded marks as appropriate.	Marks	Description	2	Possible business objective explained	1	Possible business objective identified	0	Nothing written worthy of credit	
Marks	Description										
2	Possible business objective explained										
1	Possible business objective identified										
0	Nothing written worthy of credit										

Qu	Part	Marking guidance	Total marks															
15		Using Figure 1 , analyse possible reasons for the differences in price elasticity of demand for the two products.	6															
		AO2 = 2, AO3 = 4 <table><tr><th>Level</th><th>Marks</th><th>Description</th></tr><tr><td>3</td><td>5–6</td><td>A full analysis of the economic evidence, a well-developed and logical chain of reasoning.</td></tr><tr><td>2</td><td>3–4</td><td>An incomplete analysis of the economic evidence, starts to develop a chain of reasoning. Good application of knowledge and understanding of concepts/issues mostly relevant to the context.</td></tr><tr><td>1</td><td>1–2</td><td>Analysis of discrete points of the economic evidence with no chain of reasoning attempted. Basic application of knowledge and understanding of concepts/issues with limited relevance to the context.</td></tr><tr><td></td><td>0</td><td>Nothing written worthy of credit.</td></tr></table> Indicative content: • necessity/luxury, eg cars are likely to be considered a luxury and therefore will have price elastic demand • proportion of income spent on the product • time period • availability of substitutes. Note: This indicative content is not exhaustive, other creditworthy responses should be awarded marks as appropriate.	Level	Marks	Description	3	5–6	A full analysis of the economic evidence, a well-developed and logical chain of reasoning.	2	3–4	An incomplete analysis of the economic evidence, starts to develop a chain of reasoning. Good application of knowledge and understanding of concepts/issues mostly relevant to the context.	1	1–2	Analysis of discrete points of the economic evidence with no chain of reasoning attempted. Basic application of knowledge and understanding of concepts/issues with limited relevance to the context.		0	Nothing written worthy of credit.	
Level	Marks	Description																
3	5–6	A full analysis of the economic evidence, a well-developed and logical chain of reasoning.																
2	3–4	An incomplete analysis of the economic evidence, starts to develop a chain of reasoning. Good application of knowledge and understanding of concepts/issues mostly relevant to the context.																
1	1–2	Analysis of discrete points of the economic evidence with no chain of reasoning attempted. Basic application of knowledge and understanding of concepts/issues with limited relevance to the context.																
	0	Nothing written worthy of credit.

Level	Marks	Description																
5	13–15	A justified conclusion with sustained evaluation, which is coherent and relevant, with judgements fully supported by evidence. Analysis of a relevant selection of the economic evidence, with a well-developed logical chain of reasoning. Comprehensive application of knowledge and understanding of pertinent concepts/issues relevant to the context; effective use of specialist language maintained throughout.																
4	10–12	A partially justified conclusion with an evaluation, which is mostly coherent and relevant; judgements may not be fully supported by evidence. Analysis of a relevant selection of the economic evidence; a logical chain of reasoning is established but not fully developed. Strong application of knowledge and understanding of a broad range of concepts/issues relevant to the context; mostly effective use of specialist language throughout.																
3	7–9	A partially justified conclusion with an evaluation, but not integrated in a coherent way; judgements are not fully supported by evidence. Analysis of a relevant selection of the economic evidence and starts to develop a chain of reasoning. Good application of knowledge and understanding of a broad range of concepts/issues relevant to the context; consistent use of specialist language but not always effective.																
2	4–6	A basic conclusion is present based on simple evaluative judgements supported by little or no evidence. Analysis of a relevant selection of the economic evidence with no chain of reasoning attempted. Simple application of knowledge and understanding of a narrow range of concepts/issues relevant to the context; sporadic use of specialist language.																

1	1–3	Evaluative judgements are simple with no conclusion present. Analysis of a limited selection of the economic evidence with no chain of reasoning attempted; selection of evidence may lack relevance. Basic application of knowledge and understanding of concepts/issues with limited relevance to the context; uses non-specialist language.
	0	Nothing written worthy of credit.

Indicative content:

Yes

- Knowledge of private, external, social benefits.
- Positive impact on labour markets and incomes.
- Long-term reduction in negative externalities such as congestion, air pollution etc.
- Reduced regional inequality.
- Much needed investment, especially for the North ('Levelling Up').
- Local, regional and national multiplier effects.
- Use of data.

No

- Knowledge of private, external and social costs.
- Negative impact on labour markets and incomes.
- Short-term externalities from construction.
- Partial completion of the project – no benefits for the North of the UK.
- Difficult to accurately estimate the full costs and benefits of large-scale investment projects, especially in the long term; estimates of costs have grown over time.
- Increased regional inequality.
- Use of data.

Note: This indicative content is not exhaustive, other creditworthy responses should be awarded marks as appropriate.
