GCSE COMBINED SCIENCE: TRILOGY

Foundation Tier Physics Paper 2F

Time allowed: 1 hour 15 minutes

Materials

For this paper you must have:

- a protractor
- a ruler
- · a scientific calculator
- the Physics Equations Sheet (enclosed).

Instructions

- Use black ink or black ball-point pen.
- · Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer all questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked
- In all calculations, show clearly how you work out your answer.

Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

0 1 . 4 Different types of electromagnetic waves have different uses. Draw one line from each type of electromagnetic wave to its use. [3 marks] Type of electromagnetic Use wave Electrical heaters Microwaves **Energy efficient lamps** Ultraviolet Imaging bones X-rays Satellite communications

Turn over for the next question

	The infrared detector measures the power of the infrared radiation emitted by the flasks.
0 2 . 1	The student poured hot water into each flask.
	What should the student do to reduce the risk of burning herself with the hot water? [1 mark]
0 2.2	Describe how the student should use the equipment in Figure 2 to compare the power of the infrared radiation emitted by each surface.
	[4 marks]
	Question 2 continues on the next page

A student investigated how the power of the infrared radiation emitted from a flask changed with time.

Table 1 shows the results.

Table 1

Time in seconds	Power in watts
0	8.0
60	7.2
120	6.5
180	5.9
240	5.4
300	5.0
360	4.7
420	4.5

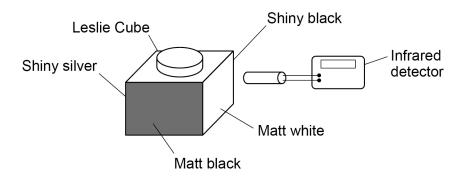

0 2 . 3	Describe the pattern shown by the data in Table 1 .	[2 marks]
0 2 . 4	What is the most likely value for the power of the infrared radiation emitted after 480 seconds?	
	Use Table 1 .	[1 mark]
	Tick (✓) one box.	
	4.0 W 4.2 W 4.4 W 4.6 W	

A Leslie Cube is used to demonstrate that different surfaces emit different amounts of infrared radiation.

Figure 3 shows an infrared detector and a Leslie Cube filled with hot water.

Figure 3

0 2 . 5	Give one advantage of using a Leslie Cube rather than the equipment in Figure 2 on page 4.
	[1 mark]
	The teacher improved the demonstration by using four infrared detectors connected to
0 2 . 6	a data logger and computer. Each detector was pointed at a different surface of the Leslie Cube.
	The distance between the surface and the detector was the same in each case.
	Give two reasons why this improved the demonstration.
	[2 marks]
	1
	0
	2

11

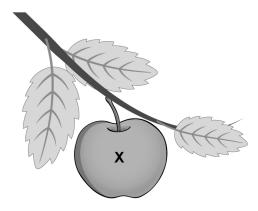

0 3 Figure 4 shows an apple hanging from a tree.

The **X** marks the centre of mass of the apple.

Figure 4

0 3 . 1 Draw an arrow on **Figure 4** to represent the weight of the apple.

[1 mark]

0 3 . **2** The apple has a mass of 0.150 kg

gravitational field strength = 9.8 N/kg

Calculate the weight of the apple.

Use the equation:

weight = mass × gravitational field strength

[2 marks]

Weight = N

0 3.3	The apple in Figure 4 is stationary.	
	Why is the apple stationary?	1 mark]
	Tick (✓) one box.	i iliai kj
	The resultant force on the apple is downwards.	
	The resultant force on the apple is upwards.	
	The resultant force on the apple is zero.	
	Question 3 continues on the next page	

	When the apple is ripe it falls from the tree and accelerates towards the ground.
0 3.4	Why does the apple accelerate? [1 mark]
	Tick (✓) one box.
	The resultant force on the apple is downwards.
	The resultant force on the apple is upwards.
	The resultant force on the apple is zero.
0 3 . 5	The acceleration of the apple is 9.8 m/s ²
	The velocity of the apple changes from 0 to 4.9 m/s
	Calculate the time taken for the apple to fall to the ground.
	Use the equation:
	time taken = $\frac{\text{change in velocity}}{\text{acceleration}}$
	[2 marks]
	Time taken = s

0 4 Figure 5 shows a compass.

0 4.1	Why does the compass always point in the same direction when it is not not a magnet?	ear [1 mark]
	Tick (✓) one box.	
	The compass is not magnetic.	
	The Earth has a magnetic field.	
	There is no force acting on the compass.	
0 4.2	What material could the needle of the compass be made from? Tick (✓) one box.	[1 mark]
	Tion (*) one box.	
	Aluminium	
	Copper	
	Plastic	
	Steel	

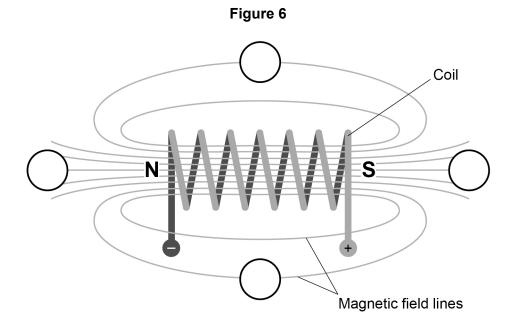

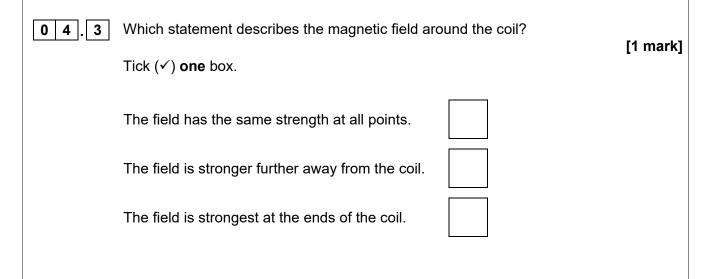

Figure 6 shows a coil of wire.

There is a current in the coil.

The circles show the position of four compasses.

0 4. Draw one arrow in each circle on Figure 6 to show the direction of the magnetic field at that point.

[2 marks]

0 4 . 5	Give two ways the magnetic field around the coil could be made stronger.	[2 marks]	outside th

0 5	The stopping distance of a car is the sum of the thinking distance and the braking distance.	
0 5 . 1	Which factors affect the thinking distance?	[2 marks]
	Tick (✓) two boxes.	[2 marks]
	Condition of the tyres	
	Driving on wet roads	
	Mass of the car	
	Tiredness of the driver	
	Using a mobile phone	
0 5.2	Explain why a person should not drink alcohol and then drive.	[3 marks]

The Highway Code gives information on how thinking distance depends on the speed of a car.

Figure 7 shows the information as a graph.

Figure 7

0 5 3 What is the speed of a car if the thinking distance is 16 m?

[1 mark]

Speed of car = m/s

0 5. 4 Describe the relationship between speed and thinking distance.

[2 marks]

0 5 The Highway Code assumes the driver's reaction time is 0.70 seconds.

Draw a line on **Figure 7** to show the relationship for a driver with a reaction time of 1.4 seconds.

[2 marks]

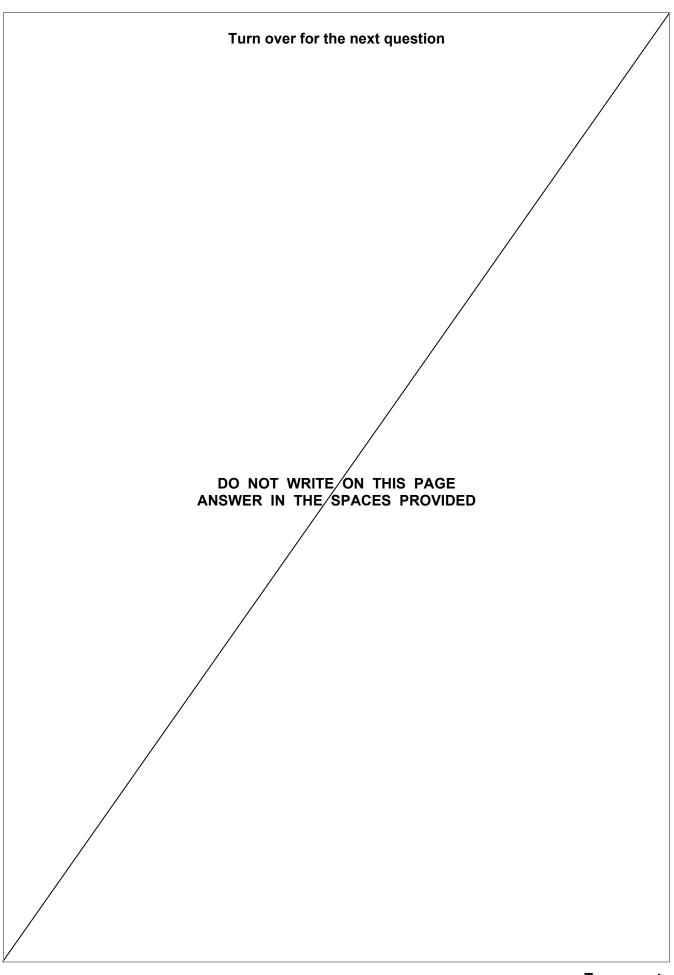

找名校导师,用小草线上辅导(微信小程序同名)

	16	
0 5 . 6	A car accelerates at 5.0 m/s ² over a distance of 45 m	
	initial velocity of the car = 0 m/s	
	Calculate the final velocity of the car.	
	Use the Physics Equations Sheet.	
	Give your answer to 2 significant figures.	[4 marks]
	Final velocity (2 significant figures) =	m/s

Do not write outside the

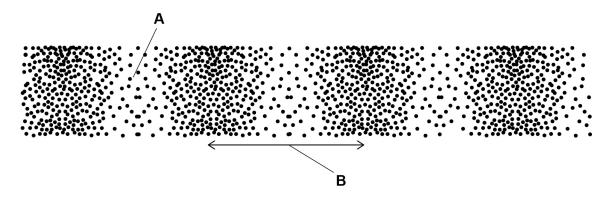

0 6

Figure 8 shows a longitudinal wave.

Figure 8

0 6 . 1 What do the labels A and B on Figure 8 represent?

Choose answers from the box.

[2 marks]

amplitude	frequency	rarefaction	reflection	wavelength

Α_____

В

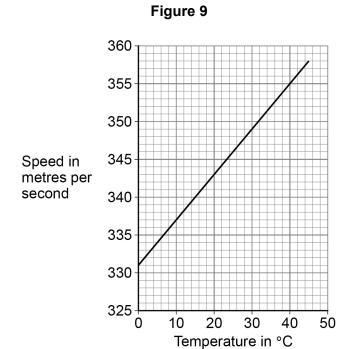

0 6 . 2	The wave shown in Figure 8 has a frequency of 4.0 kHz	
	Calculate the period of the wave.	
	Use the Physics Equations Sheet.	
	Give the unit.	[4 marks
		[+ marks
	Period =	Unit

Question 6 continues on the next page

Sound waves are longitudinal.

Figure 9 shows how the speed of sound varies with the temperature of the air.

	Use the Physics Equations Sheet to answer questions 06.3 and 06.4 .	
0 6.3	Write down the equation that links frequency (f), wavelength (λ) and wave speed (v). [1 mark]	
0 6.4	A sound wave with a frequency of 300 Hz travels through the air.	
	The air has a temperature of 28.0 °C	
	Determine the wavelength of the sound wave.	
	Use Figure 9. [4 marks]	
	Wavelength = m	-

Turn over for the next question

0 7

Figure 10 shows competitors in the wheelchair race at the London Marathon.

The distance of the London Marathon is 42 000 m

Figure 10

	Use the Physics Equations Sheet to answer questions 07.1 and 07.2 .	
0 7.1	Write down the equation that links distance (s) , force (F) and work done (W) .	[1 mark]
0 7.2	During the race competitors work against air resistance.	
	The work done against air resistance by the winner of the race was 3 360 000	J
	Calculate the average air resistance acting on the winner of the race.	3 marks]
	Average air resistance =	N

Question 7 continues on the next page

	Use the Physics Equations Sheet to answer questions 07.3 and 07.4.	
0 7.3	Which equation links distance travelled, speed and time? Tick (✓) one box.	[1 mark]
	distance travelled = speed × time time = distance travelled × speed	
	speed = distance travelled × time	
0 7 . 4	The distance of the London Marathon is 42 000 m	
	The winning time for the race was 5600 seconds.	
	Calculate the average speed of the winner of the race.	[0
		[3 marks]
	Average speed =	m/s
		I

7.5	Explain why the speed of a competitor changes during the race.	[4 marks]
