# Friday 13 November 2020 – Morning

# GCSE (9–1) Combined Science (Physics) A (Gateway Science)

J250/05 Paper 5 (Foundation Tier)

Time allowed: 1 hour 10 minutes

#### You must have:

- a ruler (cm/mm)
- the Data Sheet for GCSE (9–1) Combined Science (Physics) A (inside this document)

#### You can use:

- · a scientific or graphical calculator
- an HB pencil

Please write clearly in black ink. <b>Do not write in the barcodes.</b>							
Centre number		Candidate number					
First name(s)							
Last name							

#### **INSTRUCTIONS**

- Use black ink. You can use an HB pencil, but only for graphs and diagrams.
- Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.
- Answer all the guestions.
- Where appropriate, your answer should be supported with working. Marks might be given for using a correct method, even if your answer is wrong.

#### **INFORMATION**

- The total mark for this paper is 60.
- The marks for each question are shown in brackets [ ].
- Quality of extended response will be assessed in questions marked with an asterisk (\*).
- This document has 28 pages.

#### **ADVICE**

· Read each question carefully before you start your answer.

OCR is an exempt Charity

Turn over

#### **SECTION A**

Answer **all** the questions.

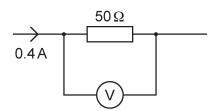

You should spend a maximum of 20 minutes on this section.

Write your answer to each question in the box provided.

- 1 Which action increases the strength of an electromagnet?
  - **A** Decreasing the current.
  - **B** Decreasing the number of turns of wire.
  - **C** Increasing the number of turns of wire.
  - **D** Using a copper core.

Your answer [1]

2 Look at the circuit diagram.

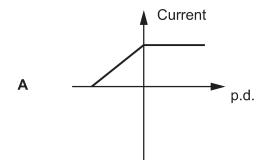

What is the potential difference across the  $50 \Omega$  resistor?

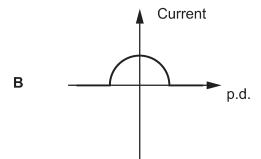

Use the equation: potential difference = current × resistance

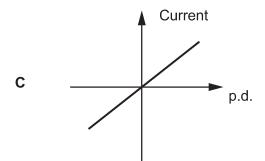

- **A** 0.008 V
- **B** 12.5 V
- **C** 20 V
- **D** 125 V

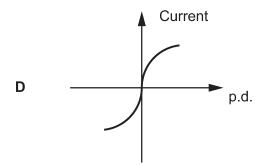

Your answer [1]

3 Which is the correct graph for a filament lamp?

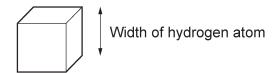

Your answer [1]

4	A m	an has a mass of 70 kg.	
	Wha	at is the weight of the man?	
	Use	the equation: gravity force = mass × gravitational field strength	
	The	gravitational field strength on Earth = 10 N/kg.	
	Α	0.7 N	
	В	7 N	
	С	700 N	
	D	700 000 N	
	You	r answer	[1]
5	Vec	tors and scalars are different.	
	Whi	ch statement is correct?	
	Α	Speed has a direction. It is a vector.	
	В	Speed only has size. It is a scalar.	
	С	Velocity is a scalar and a vector.	
	D	Velocity only has size. It is a scalar.	
	You	r answer	[1]
6	The	unit of force is the newton (N). The unit of distance is the metre (m).	
	Whi	ch unit is the same as the newton-metre (Nm)?	
	Use	the equation: work done = force × distance	
	Α	Joules (J)	
	В	Kilograms (kg)	
	С	Newtons per kilogram (N/kg)	
	D	Watts (W)	
	You	r answer	[1]

7 A physics student says a hydrogen atom is like a cube.

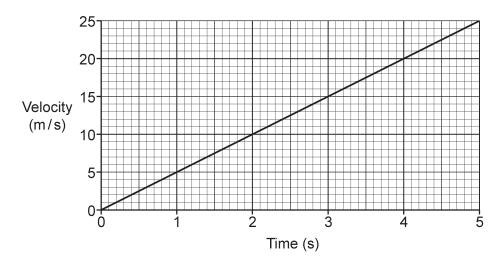

What is the approximate volume of this hydrogen atom?

- **A**  $1 \times 10^{-30} \,\mathrm{m}^3$
- **B**  $1 \times 10^{-27} \,\mathrm{m}^3$
- **C**  $1 \times 10^{-10} \,\mathrm{m}^3$
- **D**  $1 \times 10^{-9} \text{ m}^3$

Your answer [1]

8 This is a velocity-time graph for a car.

Calculate the acceleration of the car.

Use the equation: acceleration = change in velocity ÷ time

- **A**  $0.2 \, \text{m/s}^2$
- $B 5 m/s^2$
- C 6 m/s<sup>2</sup>
- **D**  $25 \,\mathrm{m/s^2}$

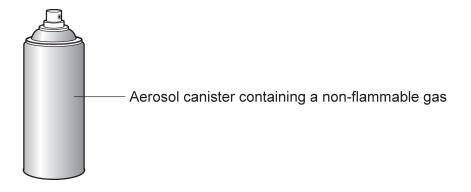

Your answer [1]

9	Whi	ch statement describes an at	om?		
	A The nucleus is smaller than the atom and contains no mass.				
	B The nucleus is smaller than the atom and contains most of the mass.				
	C The nucleus orbits the electrons and contains most of the mass.				
	D	The nucleus orbits the protoi	ns and contains electrons.		
	Your answer  10 Which row of the table describes a physical change?				
10	Whi	ch row of the table describes	a physical change?		
10	Whi	ch row of the table describes  Process	a physical change?  Material		
10	Whi		1		
10		Process	Material		
10	Α	Process  Can be reversed	Material  Keeps new properties when reversed.		
10	A B	Process  Can be reversed  Can be reversed	Material  Keeps new properties when reversed.  Returns to original properties when reversed.		

#### **SECTION B**

Answer **all** the questions.

11 An aerosol canister contains a non-flammable gas at high pressure. The aerosol canister should **not** be exposed to high temperatures.

Complete the sentences using the words below.

You can use each word once, more than once, or not at all.

accelerate	collide	faster	pressure			
slower	temperature	vibrate	volume			
When the tem	When the temperature of the gas in the aerosol canister increases, gas particles move					
The gas partic	les	with the s	ides of the aerosol can	ister more often.		
The	of the ga	as increases, s	o the aerosol canister r	nay explode.		

[3]

12 Two students, **P** and **Q**, are each calculating their mean speed when running 200 m.

One lap of a running track is 400 m.

(a) To be able to calculate their mean speed the students must use **two** pieces of apparatus and measure **two** quantities.

Draw lines to join the pictures to the correct name of the apparatus they should use.

Draw lines to join the name of the apparatus selected to the quantities they measure.

Picture of apparatus	Name of apparatus	Quantities
	30 cm ruler	Length of 200 m from the start.
(min s rdo c) (OC.00 00	Trundle wheel	Time to start moving.
	Newton meter	Time to travel 200 m.
p 10 20 30	Stopwatch	Length of 1 lap of the track.

[3]

**(b)** Student **P** makes three attempts at running 200 m. This is the results table showing the times achieved by student **P**.

First row	Time 1 (s)	Time 2 (s)	Time 3	Mean (s)
Second	31	31.2	10.1	
row				

(i)	Look at the <b>first row</b> of the table.	
	What mistake has the student made?	
	[1]	]
(ii)	Look at the <b>second row</b> of the table.	
	How many decimal places should the student have for <b>Time 1</b> ?	
	[1]	]
(iii)	Calculate the mean of the data in the table.	
	Mean =s [1]	]
(iv)	Suggest what the student could do to improve their experiment.	
	[1]	]

(c) This is part of the results table for student **Q** who runs 200 m.

Mean	(s)
40	

Calculate the mean speed of student **Q** running 200 m.

Use the equation: distance travelled = speed × time

Mean speed = ..... m/s [3]

# **BLANK PAGE**

PLEASE DO NOT WRITE ON THIS PAGE

13 Salol is a solid at room temperature. A student heats some salol in a boiling tube, as shown in Fig. 13.1.

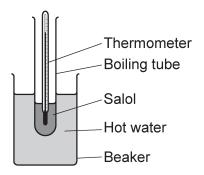

Fig. 13.1

She measures the temperature of the salol at different times. Fig. 13.2 is a graph of her results.

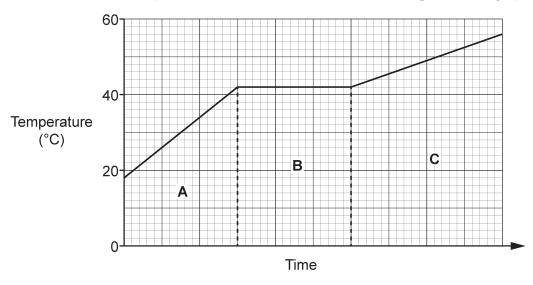

Fig. 13.2

(a) Fig. 13.3 is a model of particles in salol.

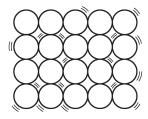

Fig. 13.3

In which part of the graph, A, B or C, would the particles look like those in Fig. 13.3?

Tick (✓) one box.

Α

В

С

[1]

	13	
(b)	What is the melting point of salol?	
	Melting point =°C	[1]
(c)	In which part of the graph, <b>A</b> , <b>B</b> or <b>C</b> , is salol a solid <b>and</b> a liquid?	
	Tick (✓) one box.	
	<b>A</b>	
	В	
	c	F41
		[1]
(d)	Complete the sentences using the words or phrases below.	
	You can use each word or phrase once, more than once, or not at all.	
	break decreases form increases stays the same	
	In part <b>B</b> of the graph, bonds between salol particles	
	In part <b>B</b> of the graph, the temperature	
	In part <b>B</b> of the graph, the kinetic energy store of the salol	
	In part <b>B</b> of the graph, the mass of the salol	- 4-
		[4]

(i)	The student is given 20 grams (g) of salol.
,,	What is the mass of salol in kilograms (kg)?
	Mass = kg [1]
(ii)	The specific latent heat of fusion of salol is 89700 J/kg.
	How much thermal energy is needed to completely melt 0.01 kg of salol?
	Use an equation from the Data Sheet to help you.
	Thermal energy =
	(i) (ii)

		15	
14	Plas	stic rods are used in static electricity experiments.	
	(a)	Describe how a student could charge a plastic rod.	
	(b)	Fig. 14.1 is a diagram of a plastic rod before being charged.	
		+	
		Fig. 14.1	
		Explain why the plastic rod becomes positively charged.	
		You may add to the diagram to explain your answer.	
	(c)	A teacher has two charged rods. One rod is positively charged.	
		She holds the positively charged rod near the other charged rod.	
		The rods move towards each other, as shown in Fig. 14.2.	
		String	
		Fig. 14.2	
		Explain why the rods move towards each other.	

15 Look at the circuit in Fig. 15.3. The lamps in the circuit are identical.

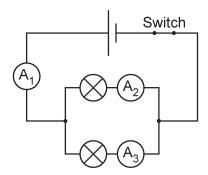

Fig. 15.3

Ammeter	$A_2$	reads	500 mA	١.
	Ammeter	Ammeter A <sub>2</sub>	Ammeter A <sub>2</sub> reads	Ammeter A <sub>2</sub> reads 500 mA

What is the reading on ammeter  $A_1$  and ammeter  $A_3$  in **amps (A)**?

Ammeter A <sub>1</sub> =	/	4
Ammeter A <sub>2</sub> =		Д
3	[2	1

**(b)** Ammeter A<sub>2</sub> still reads 0.5A.

How much charge flows through ammeter  ${\rm A_2}$  in 20 seconds?

Use the equation: charge flow = current × time

Charge flow = ...... C [2]

### **BLANK PAGE**

PLEASE DO NOT WRITE ON THIS PAGE

**16\*** A student is conducting an experiment by hanging some masses on two springs, **A** and **B**, and recording the extension.

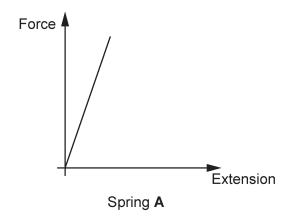

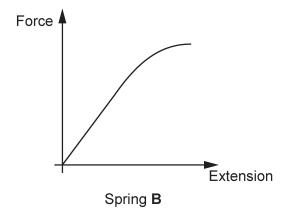

Spring A before the experiment Spring B I

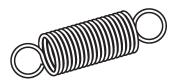

Spring **B** before the experiment

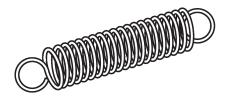

Here are graphs of his results:

Spring A after the experiment

Spring **B** after the experiment

Use the graphs to describe the properties of spring <b>A</b> and spring <b>B</b> .
Write about Hooke's law in your answer.
I In

- 17 This question is about magnetic fields.
  - (a) Fig. 17.1 is a diagram of the magnetic field around a bar magnet.

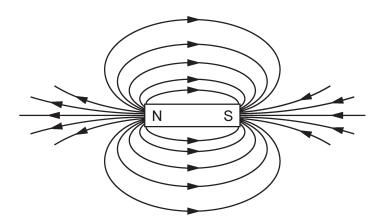

Fig. 17.1

The field lines give information about magnetic forces.

State **two** pieces of information **Fig. 17.1** gives you.

1	
2	
	[2]

(b) A student has a permanent magnet and three metal blocks marked A, B and C, as shown in Fig. 17.2.

Fig. 17.2

- One block is a permanent magnet.
- One block is a piece of copper.
- One block is a piece of iron.

Explain how the student can use the permanent magnet to identify block A, B a	and <b>C</b> .
	[3]

(c) Fig. 17.3 is a picture of a dipping compass.

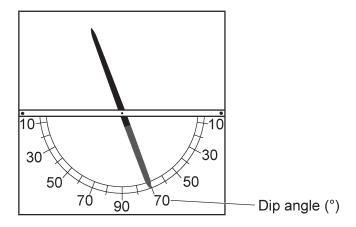

Fig. 17.3

The dip angle can be measured at different distances from the Earth's North pole.

The graph in **Fig. 17.4** shows how the dip angle varies with distance from the Earth's North pole.

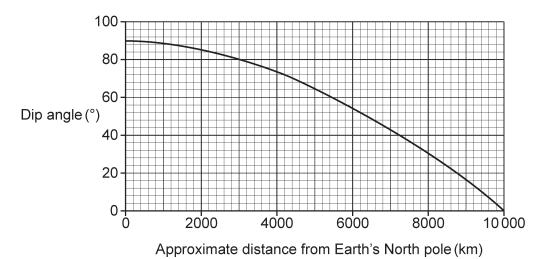

Fig. 17.4

	·	ra <sup>,</sup>
		• • •
(1)	Describe the relationship shown in the graph in Fig. 17.4.	

(ii)	London is approximately 4200 km from the North pole.	
	Use the graph in Fig. 17.4 to estimate the dip angle in London.	
	Dip angle =°	[1]
(iii)	The actual value of the dip angle in London is 66°, with an uncertainty of +/- 3°.	
	Is the value you obtained in part (c)(ii) accurate? Explain your answer.	
		[1
		•
(iv)	The dipping compass gives important information about the Earth.	
	Describe what the dipping compass tells us about the Earth.	
		[1
		F.,

(d) The graph in Fig. 17.5 shows how the magnetic field strength around a straight wire decreases with distance from the wire.

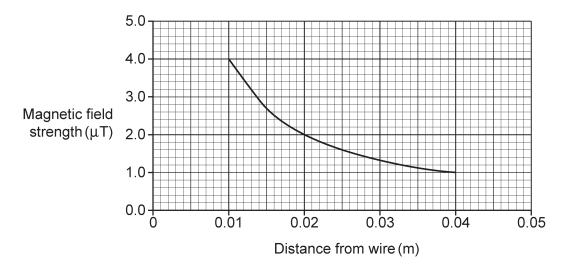

Fig. 17.5

Two students are discussing the graph in Fig. 17.5. This is what they say:
Student X: 'As distance doubles, field strength is multiplied by 0.25.'
Student Y: 'As distance doubles, field strength is multiplied by 0.75.'
Use the graph in Fig. 17.5 to evaluate each statement.
