## A-level CHEMISTRY

Paper 2 Organic and Physical Chemistry

Monday 8 June 2020

Afternoon

### Time allowed: 2 hours

#### Materials

For this paper you must have:

- the Periodic Table/Data Booklet, provided as an insert (enclosed)
- a ruler with millimetre measurements
- a scientific calculator, which you are expected to use where appropriate.

#### Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do **not** write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- All working must be shown.
- Do all rough work in this book. Cross through any work you do not want to be marked.

#### Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 105.

Initial [H <sub>2</sub> PO <sub>2</sub> <sup>-</sup> ] / mol dm <sup>-3</sup>	t/s
0.25	64
0.35	32
0.50	16
1.00	4

State the relationship between the initial concentration of phosphinate and time (t).

Deduce the order of the reaction with respect to phosphinate.

[2 marks]

4       Aspirin can be produced by reacting salicylic acid with ethanoic anhydride. An incomplete method to determine the yield of aspirin is shown.         1. Add about 6 g of salicylic acid to a weighing boat.         2. Place the weighing boat on a 2 decimal place balance and record the mass.         3. Tip the salicylic acid into a 100 cm <sup>3</sup> conical flask.         4.         5. Add 10 cm <sup>3</sup> of ethanoic anhydride to the conical flask and swirl.         6. Add 5 drops of concentrated phosphoric acid.         7. Warm the flask for 20 minutes.         8. Add ice-cold water to the reaction mixture and place the flask in an ice bath.         9. Filter off the crude aspirin from the mixture and leave it to dry.         10. Weigh the crude aspirin and calculate the yield.         4.
